Melanoma and Skin Cancer Trials

Limited

Melanoma and Skin Cancer Trials (MASC Trials) is Australia and New Zealand's collaborative clinical trials group committed to preventing and finding better treatments for melanoma and skin cancer.

Working with leading researchers, MASC Trials conducts multicentre, national and international clinical trials at more than 110 institutions in Australia and overseas.

Our diverse and growing portfolio includes research in the prevention, early detection and treatment of melanoma and skin cancer, including early to late phase clinical trials.

The high-quality evidence published from our trials changes clinical practice to impact the lives of patients and improve how doctors prevent, diagnose and treat melanoma and skin cancer.
